

Metallurgical Grade Gibbsite Bauxite

Bauxite Marketing Limited (a wholly owned subsidiary of Vimetco N.V.) is offering premium grade trihydrate bauxite to the market. The bauxite is a gibbsitic bauxite (containing <0.5% MHA) and is used as feed stock for low pressure alumina refineries and for high pressure refineries as a very effective sweetening bauxite. The bauxite is supplied directly from the company's mine in Sierra Leone and is currently available for immediate shipment.

Available Quantity Up to 100,000 metric tonnes per month

Quality

Component	Guaranteed	Typical
Available Al ₂ O ₃	Min. 47%	48.6 %
Reactive SiO ₂	Max. 4.5%	3.1%
Free moisture	Max. 10%	10%
Fe ₂ O ₃	Min. 11%	13.5%
Sizing	Max. 4 inch (100mm)	< 100mm

Loading Rate	8,000 tpd (PWWD)
Loading Port	Sherboro, Sierra Leone
Terms & Conditions	IRLC, shipping within 30-45 days from BOL
Price FAS Spot	Available on request
Price CIF Spot	Available on request, please include receiving port details
Pricing Long Term	Similar to Boké or Trombetas PP
